AAC Starbuck VB Canada Western Red Spring Wheat

Progress Through Research
Le progrès grâce à la recherche

Description:

AAC Starbuck VB is a very high yielding semi-dwarf CWRS with good lodging tolerance and is rated MR to FHB resistance. AAC Starbuck VB is also tolerant to the orange wheat blossom midge. AAC Starbuck VB is well-adapted to the wheat growing regions across the western Canadian Prairies.

Certified seed of AAC Starbuck VB will be sold as a varietal blend made up of 90% AAC Starbuck and 10% AAC Brandon. Blending with the midge susceptible variety AAC Brandon provides a refuge area for non-virulent midge to survive at low levels, thereby extending the useful life of the *Sm1* midge tolerant gene.

Parentage: Griffon/BW876//Carberry

Strengths:

- 114% of the grain yield of AC[®] Carberry
- Semi-dwarf with height similar to AC[®] Carberry
- Moderately resistant to FHB, low DON accumulation
- Moderately resistant to leaf rust, stripe rust and loose smut

Neutral Traits:

- Grain protein potential similar to AC[®] Carberry
- Maturity similar to AC[®] Carberry
- Slightly weaker straw strength compared to AC[®] Carberry
- Intermediate resistance to stem rust

Weakness:

- Susceptible to common bunt and leaf spot

Breeder:
