

AAC Wigle

June 2026

Variety Fit:

One of the highest lines for protein with very large seed size. AAC Wigle is a great option for highly productive acres with excellent standability and very good white mould tolerance.

Image: Plattsville, ON, White Mould Nursery. Sept. 5, 2025. Excellent standability.

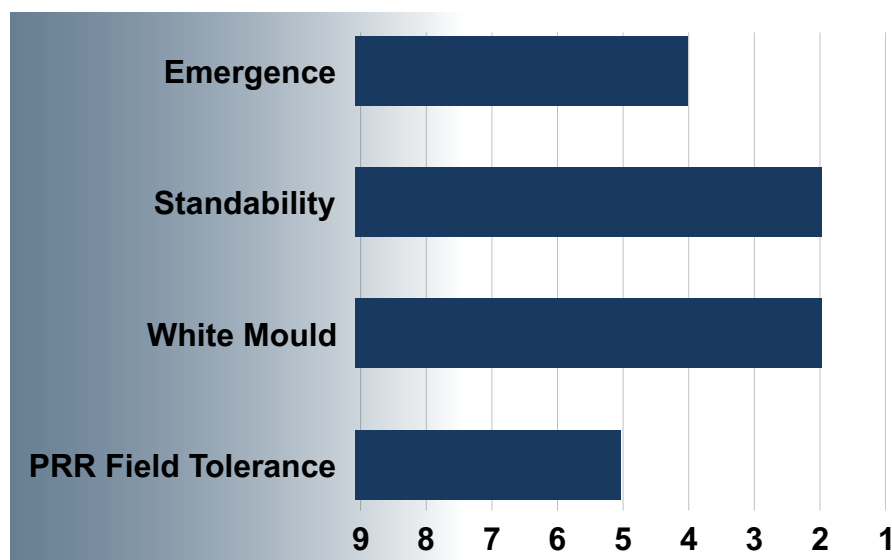

2.5 RM, 3150 HU

Very high protein

Standability

White mould tolerance

Rating Scale: 1-2 excellent (E), 3-4 very good (VG), 5-6 good (G), 7-8 fair (F), 9 poor (P)

Definitions: AA = Above Average, A = Average
NP = Needs Placement (avoid placing on acres where field has a history of challenges with the assigned trait or manage accordingly)

Agronomy Characteristics

Plant Height	Medium-Tall
Canopy Type	Medium-Thin
Standability	AA
Maturity	2.5 RM
Emergence	A
Row Width (inches)	7-30
Soil Type	All

Disease Characteristics

SCN Resistance	PI 88788
White Mould	AA
PRR Field Tolerance	NP
PRR Gene	N/A
SDS Tolerance	NP
