## CDC Forest Green Field Pea

Progress Through Research  
Le progrès grâce à la recherche

### Description:

CDC Forest is a very high yielding green cotyledon, semi-leafless field pea with good lodging tolerance, improved mycosphaerella blight resistance and powdery mildew resistance.

**Parentage:** CDC Bronco/Nitouche//Argus

### Strengths:

- Improved yield (117%) compared to the mean of the green check varieties (CDC Striker and Cooper)
- Fair mycosphaerella resistance, better than the checks
- Powdery mildew resistance

### Neutral:

- Good lodging resistance; similar to checks
- Medium vine length, slightly taller than the checks

- Medium maturity, 1 day later than Cooper, and 3 days later than CDC Striker
- Medium seed size, slightly smaller than the checks
- Round seed shape, blockier than CDC Striker but rounder than Cooper
- Low seed coat breakage percent, similar to Cooper and less than CDC Striker
- Good bleaching resistance
- Moderate green colour intensity, similar to checks
- Fair Fusarium wilt resistance; similar to checks
