NEW Graves E3

2675 HU (RM 0.5)

- ✓ Well-suited for soils where SCN and Phytophthora root rot are present
- ✓ Very good shatter tolerance

Intermediate – Bushy Canopy
Medium Height

BACKGROUND		CHARACTERISTICS							
Line Number	Trait	Herbicide Tolerance(s)	Hilum Colour	Plant Height	Standability	Canopy Type	Flower Colour	Pubescence	Pod Colour
SC22-2675E3	Enlist E3™	Glyphosate 2,4-D choline Glufosinate	Light Brown	Medium	6.5	Intermediate - Bushy	Purple	Gray	Light Brown

MANAGEMENT		
Row Width (")	Soil Type	Emergence
7.5 – 30	All	8

DISEASE & PATHOGENS						
White Mold	SCN Resistance (Source)	Phytophthora Root Rot Field Tolerance	Phytophthora Root Rot Resistance Gene(s)	Stem Canker	Sudden Death Syndrome	Charcoal Root Rot
5.5	Yes (PI 88788)	Tolerant	Rps3a	Resistant	Not Available	6

Data values were collected under different management practices at different locations in different years, and are for comparison purposes only. Ratings on a scale of 1-9; 1=worst, 9=best.

Enlist E3™ soybeans contain the Enlist E3 trait that provides crop safety for use of labelled over-the-top applications of glyphosate, Glufosinate and 2,4-D herbicides featuring Colex-D® technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist™ crops are products that feature Colex-D technology and are expressly labelled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist E3 soybeans.

WARNING: Enlist E3 soybeans are tolerant of over-the top applications of glyphosate, glufosinate, and 2,4-D. Accidental application of incompatible herbicides to this variety could result in total crop loss. When using 2,4-D herbicides, grower agrees to only use 2,4-D products that contain Colex-D technology authorized for use in conjunction with Enlist E3 soybeans. Always read and follow herbicide label directions prior to use. Enlist 1™ and Enlist Duo™ are the only 2,4-D products authorized for use with Enlist crops. Consult Enlist herbicide labels for weed species controlled. Additional product-specific stewardship requirements for Enlist crops, including the Enlist™ Product Use Guide, can be found at www.EnlistCanada.ca. **Always read and follow label directions.** The transgenic soybean event in the Enlist E3™ soybean was jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C. ®™ Enlist, Enlist E3, the Enlist E3 logo, and Colex-D are trademarks of Dow AgroSciences LLC.
