Technical Bulletin

SeCan
Canada's Seed Partner

Inwood

October 2026

Variety Fit:

Very high protein along with high sucrose, making this an excellent multi-purpose end-use bean. Attractive bean with golden colour and strong agronomics, including excellent Phytopthora field tolerance and SDS tolerance.

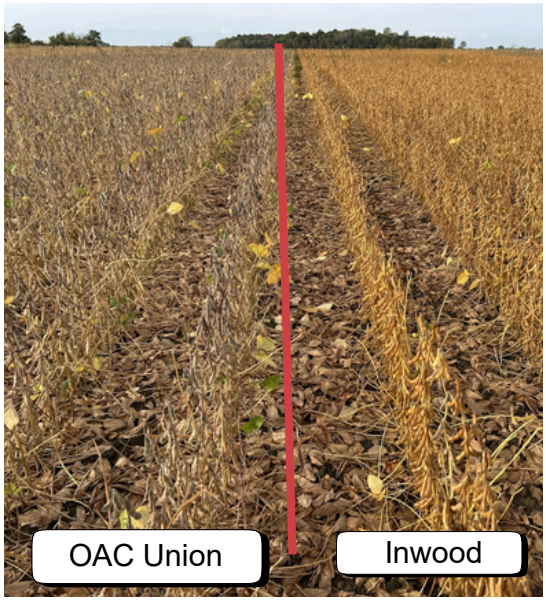

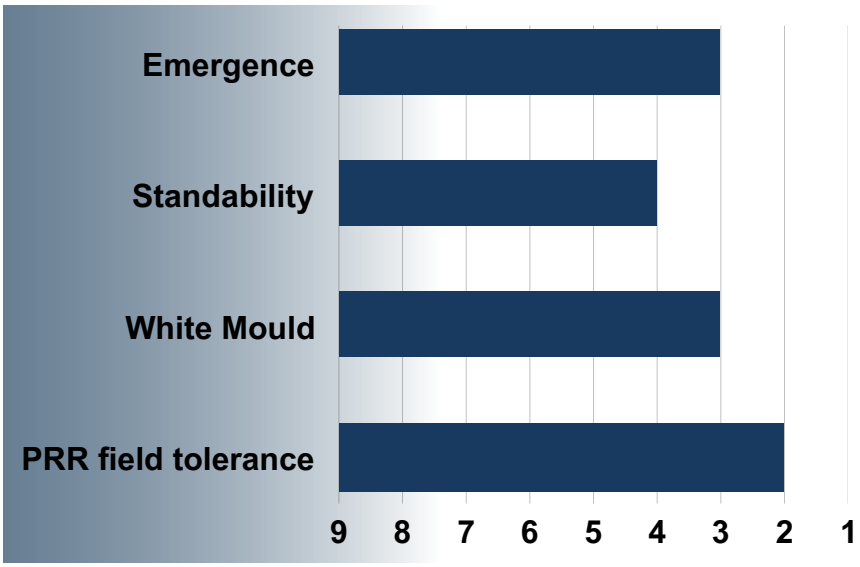

Image: Exeter, ON, Sept. 22, 2026.

- 1.4 RM, 2875 HU
- Very high protein
- High sucrose
- Large seed
- Phytophthora field tolerance
- SDS tolerance

Rating Scale: 1-2 excellent (E), 3-4 very good (VG), 5-6 good (G), 7-8 fair (F), 9 poor (P)

Definitions: AA = Above Average, A = Average, NP = Needs Placement (avoid placing on acres where field has a history of challenges with the assigned trait or manage accordingly)

Agronomy Characteristics

Plant Height	Medium
Canopy Type	Medium-Bush
Standability	A
Maturity	1.4 RM
Emergence	A
Row Width (inches)	7-30
Soil Type	All

Disease Resistance

SCN Resistance	PI 88788
White Mould	AA
PRR Field Tolerance	AA
PRR Gene	Rps 1c
SDS Tolerance	A
