OAC Bayfield **2650 Heat Unit Soybean** *Relative Maturity 0.4*

Characteristics

Growth Habit:	Indeterminate
Plant Type:	Upright
Pubescence:	Tawny
Flowers:	Purple
Pods:	Brown
Plant Height:	81 cm
Lodging Resistance:	Excellent (2.1)
Disease:	Moderately tolerant to phytophthora
Row Width:	7" to 30"
Hilum:	Brown
Oil:	20.9%
Protein:	42.2%
Seed Size:	Large (5100 seeds/kg)
Days to Maturity:	113

Agronomic Performance

- Excellent yield in both wet and dry years
- Adapted for all soil types in Ontario and in areas above the 2600 HU zone
- Performs well in both conventional and no-till operations
- Does best in medium row widths
- A consistent performing variety used in non-GMO food grade programs for its higher protein level
- Moderately tolerant to phytophthora root rot
- Still being grown after 18 years
- Developed by University of Guelph
