

OAC London

June 2026

Variety Fit:

Top-end yield with broad adaptation across soil types, excelling on clay-based soils. SC 7422 adds significant yield over OAC Bruton with food-grade characteristics that allow for multi-purpose end-use, including high sucrose.

(SC 7422 - impressive strong branching)

2.2 RM, 3100 HU

Emergence

Large plant

Rps 3a gene

Phytophthora field tolerance

High sucrose

Agronomy Characteristics

Plant Height	Medium-Tall
Canopy Type	Medium-Bush
Standability	A
Maturity	2.2 RM
Emergence	AA
Row Width (inches)	7-30
Soil Type	All

Disease Characteristics

SCN Resistance	PI 88788
White Mould	A
PRR Field Tolerance	A
PRR Gene	Rps 3a
SDS Tolerance	NP

Emergence

Standability

White Mould

PRR Field Tolerance

9 8 7 6 5 4 3 2 1

Rating Scale: 1-2 excellent (E), 3-4 very good (VG), 5-6 good (G), 7-8 fair (F), 9 poor (P)

Definitions: AA = Above Average, A = Average, NP = Needs Placement (avoid placing on acres where field has a history of challenges with the assigned trait or manage accordingly)
