OAC Malory

October 2026

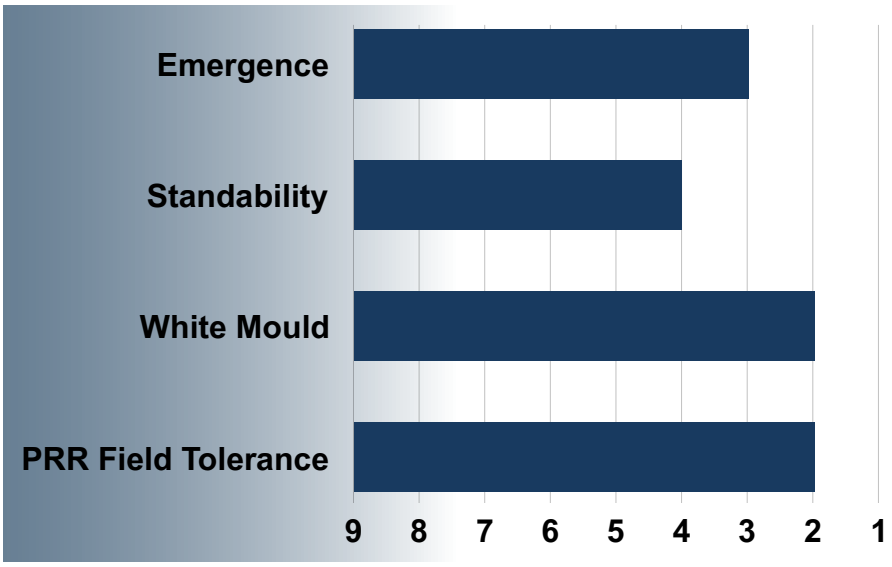

Variety Fit:

Yellow hilum food-grade variety with very high sucrose. Great fit across acres with medium-tall plant height and excellent Phytophthora field tolerance for poorly drained acres.

Image: Branchton, ON, Sept. 2018

- 1.0 RM, 2800 HU
- Very high sucrose
- Phytophthora field tolerance
- Medium-Tall plant

Rating Scale: 1-2 excellent (E), 3-4 very good (VG), 5-6 good (G), 7-8 fair (F), 9 poor (P)

Definitions: AA = Above Average, A = Average
NP = Needs Placement (avoid placing on acres where field has a history of challenges with the assigned trait or manage accordingly)

Agronomy Characteristics

Plant Height	Medium-Tall
Canopy Type	Medium-Bush
Standability	A
Maturity	1.0 RM
Emergence	A
Row Width (inches)	7-15
Soil Type	All

Disease Resistance

SCN Resistance	PI 88788
White Mould	AA
PRR Field Tolerance	AA
PRR Gene	N/A
SDS Tolerance	A
