Technical Bulletin

SeCan
Canada's Seed Partner

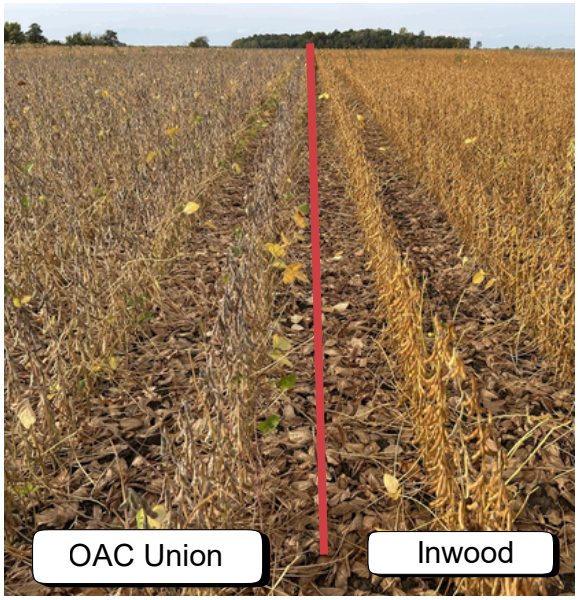

OAC Union

October 2026

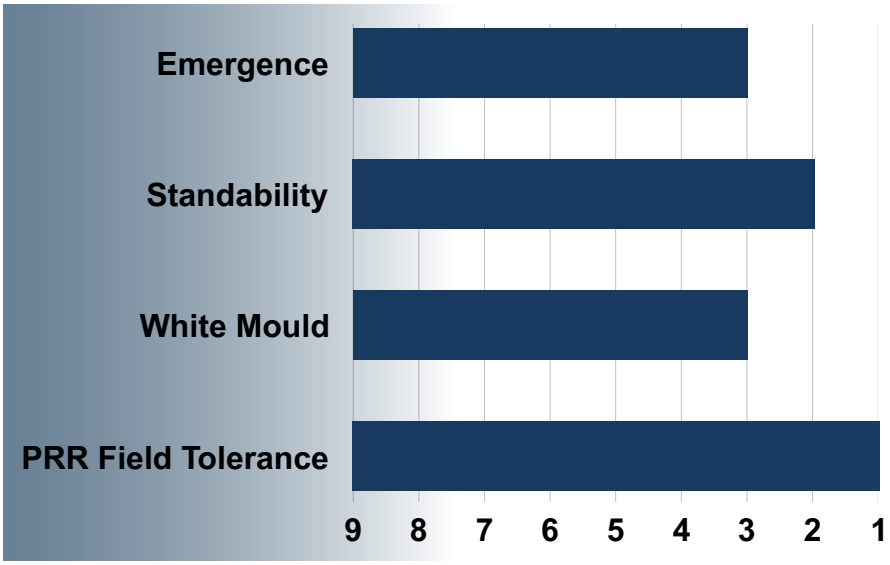

Variety Fit:

Top-yielder in OSACC trials, with broad adaptation and industry-leading Phytophthora field tolerance. Yellow hilum with very high sucrose and genetic background, which supports excellent miso and soy milk end-use.

Image: Exeter, ON, Sept. 22, 2026.

- 1.4 RM, 2875 HU
- Very high sucrose
- Standability
- Phytophthora field tolerance

Rating Scale: 1-2 excellent (E), 3-4 very good (VG), 5-6 good (G), 7-8 fair (F), 9 poor (P)

Definitions: AA = Above Average, A = Average
NP = Needs Placement (avoid placing on acres where field has a history of challenges with the assigned trait or manage accordingly)

Agronomy Characteristics

Plant Height	Medium
Canopy Type	Medium
Standability	AA
Maturity	1.4 RM
Emergence	A
Row Width (inches)	7-30
Soil Type	All

Disease Resistance

SCN Resistance	PI 88788
White Mould	AA
PRR Field Tolerance	AA
PRR Gene	N/A
SDS Tolerance	AA
