Baden Six-Row Barley

Description

Six-row spring feed barley with short, strong straw and excellent yield potential across all areas of Ontario.

Strengths

- High yield potential
- Short straw with excellent lodging resistance

Management

- Maturity slightly shorter than many varieties in Ontario Cereals Crop Committee trials
- Increased susceptibility to net blotch and powdery mildew
- Plant seed uniformly treated with an effective fungicide for disease control of loose smut

2018 Spring Barley Performance Trial Cumulative Yield Index¹ Summary, OCCC, Dec 2018

1. Values differing by less than 3 within a column may not represent true differences in yield. Yield Indices are Heritability Adjusted Relative Values (HARV), which favour results from trial locations with high repeatability. For more information, see: Yan, W. Use of HARV in Variety Trial Summaries. 2. See area map on GoCereals.ca website. 3. Cultivar yield ranking may vary from year to year. Decisions are therefore best made using data with the greatest number of years 🌿 🌿 = PBR Status; indicates varieties protected under PBR 91 or PBR 78. Visit pbrfacts.ca to learn more.
